## PEDIATRICS

Specialized Services for Newborns  
through Young Adults

[valleyhealth.org](http://valleyhealth.org)

# PEDIATRIC SERVICES AT VALLEY HEALTH

From newborn nursery visitations to walk-in appointments for sick patients to after hours care, our experienced pediatricians and family medicine physicians offer the exceptional care and sensitive bedside manner that your child needs to get a healthy start.

## Newborn Nursery Service:

Valley Health physicians begin care for your child at birth. Our team of physicians first examine your son or daughter at the hospital nursery at Cabell Huntington Hospital. It is then important for your child to visit his or her doctor two or three days after going home from the hospital.

## Vaccines:

A critical component to your child's health is administration of vaccines that protect your child from disease. Our staff will review the recommended vaccines and conveniently offer them at our centers. Valley Health also participates in the Vaccine for Children program (VFC). VFC offers vaccines at no cost to children who are not insured for them.

## Behavioral Health & Counseling:

Valley Health's staff of medical psychiatrists and therapists can address challenging behavior issues, habits, stress or emotions of your child.

## Healthy Eating:

Dietitians are available through the WIC (Women, Infants & Children) program for nutritional counseling and eating habits. Valley Health offers WIC services in all the counties where our health centers are located.

## Well Child Visits:

Healthy children require routine visits to our office so we can chart growth, review milestones, examine your child, etc. We follow the Academy of Pediatrics well-child schedule, which is consistent with vaccine administration.

## SCHOOL-BASED HEALTHCARE

Valley Health is proud to operate seven school-based health centers across Cabell, Lincoln, and Wayne counties. Because of the service they provide, it means that if your child gets sick or hurt, needs a sports physical, counseling, nutrition services, an updated vaccine or even a referral for specialized care, you can take comfort in knowing that we will deliver the ultimate in convenience when it comes to your child's health... right at school. For your child to be eligible to receive services, simply complete an enrollment form, which is available at your local school-based health center or online at [valleyhealth.org/SchoolBased](http://valleyhealth.org/SchoolBased).

## CARE WHEN YOU NEED IT

For unexpected illnesses or minor injuries, children will be seen without an appointment. We're also open after hours at the following locations:
