Family Medicine Health Care

Because of their extensive training, family physicians are the only specialists qualified to treat most ailments and provide comprehensive health care for people of all ages – from newborns to seniors.

Comprehensive Care For The Entire Family

- Child, adolescent and adult
- Routine well-baby and well-child care, including immunizations
- Gynecological, including pap smears
- Geriatric care
- Family medicine physicians are dedicated to treating the whole person.
- In addition to diagnosing & treating illnesses, they offer preventative care:
 - Routine checkups for all ages
 - Health-risk assessments
 - Immunizations and screening tests
 - Personalized healthy lifestyle counseling
- Physicians also manage chronic illnesses, often coordinating care provided by other specialists.

From heart disease, stroke and hypertension, to diabetes, cancer, and asthma, family physicians provide ongoing, personal care for the nation's most serious health problems.

24/7 Access to a Provider

During non-business hours, Valley Health has providers on call. Simply call your local Valley Health center. Our answering service will connect you to the appropriate provider on call for a consultation.

Communicate with the provider's office through My Valley Health, our online patient portal found on our website. The portal also gives you access to your medical information.
